

Hello, world!

I am written in markdown. I am (hopefully) going to be converted to a nice, pretty, Tex pdf.

Here is some code for good measure.

```
#include <stdio.h>
```

```
int main(int argc, char *argv[]) {  
    printf("Hello, world!\n");  
    return 0;  
}
```

- Let's
- hope
- this
- works!

Okay, bye for now :)
